

Ravi Teja

Bengaluru, Karnataka

Ph: 7995173739 bethuraviteja.in@gmail.com linkedin.com/in/raviteja github.com/RaviTeja1864

Profile

I started with tutorials, moved to personal projects, and somewhere along the way realized I'm not learning the right things anymore. I know Django and PostgreSQL well enough to build, and I can handle React when the frontend needs me. Now I'm seeking an internship where the problems are real, the code is production, and every day teaches me something a tutorial never could.

Education

Jain (Deemed-to-be University), Faculty of Engineering & Technology

Aug 2023 – Present

Bachelor of Technology in Information Science & Engineering

Bengaluru, Karnataka

Relevant Coursework

- Data Structures & Algorithms
- Database Management Systems
- Web Technologies
- Operating Systems
- Object-Oriented Programming
- Computer Networks
- Software Engineering
- Artificial Intelligence

Projects

Solo Tutor — AI-Powered Learning Platform | Python, Django, React, PostgreSQL

2024 – Present

Patent Filing In Progress · 5 Student Co-Inventors · github.com/RaviTeja1864

- Designed and developed a full-stack tutoring app with JWT auth, Django REST Framework APIs, and a PostgreSQL schema supporting multi-user access.
- Built an automated quiz generation module from user-uploaded study material; named co-inventor on the Invention Disclosure Form and patent application at Jain University.

E-Commerce Backend API | Python, Django REST Framework, PostgreSQL

2024 – Present

In Progress · github.com/RaviTeja1864/Ecommerce-Backend

- Developing a REST API for product catalog, cart, and order management with JWT authentication, nested serializers, and search filtering.
- Structured into reusable Django apps with clean separation of models, serializers, views, and URLs; pagination and REST best practices applied throughout.

AI Toolkit Web App | HTML, CSS, JavaScript

2025

Live: ai-toolkit-2026.netlify.app

- Built a searchable portal aggregating 30+ AI tools across writing, image generation, code, and productivity for university students.
- Deployed on Netlify with a responsive UI; actively used by peers at Jain University as a daily productivity resource.

Technical Skills

Languages: Python, JavaScript, HTML, CSS, SQL

Frontend: React.js, HTML, CSS, JavaScript

Backend: Django, Django REST Framework, REST APIs, JWT Authentication

Databases: PostgreSQL, MongoDB

AI / Local LLMs: Ollama (installation & model running), Local LLM experimentation

Developer Tools: Git, GitHub, VS Code, Ubuntu

Achievements & Extracurricular

- Actively solving Data Structures & Algorithms problems on a structured sheet; targeting 350+ problems to sharpen problem-solving skills.
- Self-learning local LLMs using Ollama running and experimenting with open-source models on personal hardware as a self-driven initiative.
